DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-21, and 26-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Biester et al (US 6,505,609 B1).

Biester et al disclose a method for controlling solenoid valves that control the injection of fuel including injector and booster capacitor (col. 1, lines 7-24), comprising: discharging the booster capacitor (145); sensing a characteristic of the booster capacitor; and determining a system error or failure based at least in part upon said sensing (Figs. 1-3; and col. 2, line 7 through col. 5, line 48). Also note in specification, which describes the operation of the booster.

Application/Control Number: 10/797,522 Page 3

Art Unit: 3747

4.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negatived by the manner in which the invention was made.

Claim 22-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Biester et

al in view of Larson (US 4,404,847).

As above discussions, Biester et al do not discloses an injector including a fluid pathway

and a control selectably regulating or controlling flow in or through the pathway. The reference

of Larson teaches a fluid conditioning and flow measurement circuit for testing a fuel injection

apparatus including a fluid pathway and a control selectably regulating or controlling flow in or

through the pathway (col. 2, line 30 through col. 6, line 50). It would have been obvious to one

having ordinary skill in the art at the time the invention was made to modify the engine of Biester

et all by providing the test apparatus (12) for regulating or controlling the flow in or through the

pathway as taught by Larson in order to improve the injected efficiency of the engine.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

Nakayama et al (US 6,557,532), and Harris (US 4,553,247).

6. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Johnny H. Hoang whose telephone number is (571) 272-4843.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephens K. Cronin can be reached on (571) 272-4536. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you

would like assistance from a USPTO Customer Service Representative or access to the

automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
